

# COVID-19 TESTING AVAILABLE TO ALL CHESCO RESIDENTS & WORKERS

## **COVID-19 Testing Available to All Chester County Residents and Workers**

As Chester County goes to green on June 26, the Chester County Health Department remains focused on public health practices that best monitor and respond to COVID-19. These practices help to contain outbreaks, minimize community spread of coronavirus, and break the cycle of transmission. We continue to conduct investigations of everyone who has a confirmed-positive COVID-19 test. We have expanded our contact tracing to more quickly and thoroughly notify everyone who is in close contact with those who have tested positive for COVID-19. And we are increasing access to diagnostic swab testing for anyone who is high risk for COVID as well as for anyone who may be asymptomatic. Bringing these three things together is the best public health strategy to help us better understand the presence of COVID-19 and monitor any surge in cases in Chester County.

With this strategy, Chester County government and the Health Department are doing what Chester County does best: We plan because we care, and we invest because we can. We are better positioned to move to Green because of our strategy of investigations, contact tracing and increased testing, along with physical distancing and universal masking.

No cost testing is available throughout the County for all residents and individuals who work in Chester County. County sponsored locations, times and registration can be found by clicking the testing information link below. If you have healthcare insurance, please bring your card.
